

Phu T. Van, PhD

Bioinformatics Solutions Manager

pvan@alumni.cmu.edu , <https://ptvan.github.io>

SUMMARY

I'm interested in scientific or technical positions on collaborative teams working to solve complex problems in computational biology.

TECHNICAL STRENGTHS

Programming	R, Python, Matlab, C/C++, bash, JavaScript, Perl
Data Analysis	dimension reduction, clustering, regression/classification
Statistics	linear models, variable selection, hypothesis testing
Databases	MySQL/MariaDB, PostgreSQL, SQLServer
Workflows	Nextflow, WDL, Slurm, Docker, GitHub
Markup/Interfaces	LaTeX, Markdown, Shiny, HTML
Bioinformatics	STAR, RSEM, BLAST, SAMtools/BCFtools, DEG, GSEA, KEGG, STRING

EXPERIENCE

TwinStrand Biosciences <i>Bioinformatics Solutions Manager</i>	November 2021 - Present <i>Seattle, WA</i>
--	---

- Served as bioinformatics expert for the company in approving new projects.
- Provided bioinformatics guidance to external clients through Field&Technical Support departments.
- Supported Custom Applications department in creating new genomic panels.
- Supervised Advanced Sequencing Technology projects in collaboration with Laboratory Sciences department.
- Oversaw production of new R software packages in collaboration with Bioinformatics Development department.
- Spearheaded data mining collaborations with the Data Engineering department and co-led joint Machine Learning Interest Group.
- Reviewed company marketing and training materials for technical accuracy.
- Initiated and later supervised data analyses that expanded DuplexSeq(TM) support to two new sequencing platforms.

TwinStrand Biosciences <i>Bioinformatics Scientist II</i>	January 2021 - October 2021 <i>Seattle, WA</i>
---	---

- Performed analyses on duplex sequencing data for diverse projects including mutagenesis and cancer MRD.
- Contributed R code to internal bioinformatic pipelines and customer-facing reports.
- Presented findings to commercial and academic clients.
- Performed code reviews of R packages.

Fred Hutchinson Cancer Research Center <i>Bioinformatics Analyst, Analyst Group Leader</i>	October 2015 - December 2020 <i>Seattle, WA</i>
--	--

- Performed differential gene expression and geneset enrichment analysis on transcriptomic datasets.
- Performed variable selection and sensitivity analyses on flow cytometry datasets.
- Led the lab's PhD-level analysts in brainstorming sessions and journal club.
- Coordinated analyses on projects with external collaborators.
- Authored Statistical Analysis Plans and peer-reviewed manuscripts.

- Created bioinformatic analysis pipelines using R, Nextflow and WDL.
- Created interactive data visualizations using RMarkdown, igraph and leaflet.
- Mentored PhD students and bench scientists on statistics, advised hiring and performed reviews of junior analysts' code.

Fred Hutchinson Cancer Research Center

October 2014 - October 2015

Postdoctoral Fellow

Seattle, WA

- Developed R code to normalize mass cytometry data across experiments using multi-mixture models.
- Worked with engineers from FlowJo Inc. (Ashland, OR) to develop parsing in of XML-encoded flow cytometry data in FlowJo v10.
- Performed dimension reduction on mass cytometry data and identified correlates of disease.

Carnegie Mellon University

August 2009 - May 2014

PhD Student

Pittsburgh, PA

- Designed and built a patented high-dynamic-range protein gel imager with robotic gel cutting arm for capturing rare proteins.
- Developed **SIGILab**, a C++ GUI application controlling gel imager's acquisition of high-dynamic-range images.
- Developed processes that improved reduction and alkylation of complex protein samples in preparation for mass spectrometric sequencing.
- Developed workflows to quantify protein abundances in 2DE gel images using bash.

Institute for Systems Biology

May 2006 - August 2009

Research Associate

Seattle, WA

- Identified factors that affect peptide detectability in mass spectrometry experiments using R.
- Constructed a SQLServer database with web frontend for exploring mass spectrometry data and planning proteomic experiments.
- Developed a regression algorithm in R to model regulators of stress response in microarray data.

EDUCATION

Carnegie Mellon University

2014

PhD, Biological Sciences

University of Washington

2007

BS, Biology (Physiology specialization), BS, Wildlife Sciences

CONFERENCES, PATENTS AND REPRESENTATIVE PUBLICATIONS

1. J. Simmons, K. Dill-McFarland, C. Stein, P. Van, Chihota V., Ntshiq T., Maenetje P., Peterson G., Benchek P., Velen K., Fielding K., Grant A., Gottard R., Mayanja-Kizza H., Wallis R., Churchyard G., Boom W.H., and Hawn T.R. Monocyte transcriptional responses to Mycobacterium tuberculosis associate with clinical resistance to TST/IGRA conversion in Uganda and South Africa. *mSphere*, 2022. in press
