## WORK EXPERIENCE

TwinStrand Biosciences	2021Nov -	Bioinformatics Solutions Manager	Served as bioinformatics SME for the company in approving new projects. Spearheaded "à la carte" bioinformatic offering to customers to increase revenue. Provided bioinformatics guidance to customers with Field&Technical Support department. Assisted Custom Applications department in creating new genomic panels. Supervised R&D collaborations between bioinformatic and wetlab technicians. Oversaw development of new R data analysis packages. Initiated and later supervised data analyses that expanded TwinStrand DuplexSeq(TM) support to two new sequencing platforms. Produced whitepapers and reviewed marketing materials for technical accuracy. Co-authored customer communication SOPs. Reference: Clint Valentine III, MS · <a href="mailto:clint@twinstrandbio.com">clint@twinstrandbio.com</a>
	2021Jan - Oct	Bioinformatics Scientist II	Performed analyses on duplex sequencing data for numerous mutagenesis and cancer diagnostic projects. Reviewed and contributed R code to internal bioinformatic pipelines and customer-facing reports. Prepared data products and presented findings to industry and academic clients. Reference: Fang Yin Lo, PhD · <a href="mailto:fangyinlo@gmail.com">mailto:fangyinlo@gmail.com</a>
Fred Hutchinson Cancer Research Center	2014 - 2020	Postdoc → Bioinformatics Analyst	Coordinated projects among PhD-level analysts, led brainstorming sessions and journal clubs. Performed analyses on flow cytometry and transcriptomic datasets. Created data analysis pipelines & interactive data visualizations. Authored Statistical Analysis Plans & peer-reviewed manuscripts. Reviewed junior analysts' code, mentored PhD students and bench scientists on statistics. Developed R code to normalize mass cytometry data across experiments using multi-mixture models. Performed dimension reduction on mass cytometry data and identified correlates of disease using regression. Reference: Amy Paguirigan, PhD · <a href="mailto:apaguiri@fredhutch.org">apaguiri@fredhutch.org</a>
	2009 - 2014	Doctoral Student	Designed and built a patented high-dynamic-range protein gel imager with robotic gel cutting arm for capturing rare proteins. Developed <b>SIGILab</b> , a C++ GUI application controlling gel imager's acquisition of high-dynamic-range images. Developed bash scripts to quantify protein abundances in 2DE gel images. Lectured in Modern Biology course and mentored junior students. Reference: Jonathan Minden, PhD · <a href="mailto:minden@cmu.edu">minden@cmu.edu</a>

## TECHNICAL SKILLS

Programming	R, Python, Matlab, C/C++, bash, JavaScript, Perl
Data Analysis / Statistics	dimension reduction, clustering, regression/classification, linear models, variable selection, hypothesis testing
Databases	MySQL/MariaDB, PostgreSQL, SQLServer
Workflows	Nextflow, Slurm, Docker, GitHub

## EDUCATION

2009 - 2014 Carnegie Mellon University

PhD, Biological Sciences

2001 - 2007 University of Washington

BS, Biology (Physiology specialization); BS, Wildlife Sciences

## SELECTED PUBLICATIONS, POSTERS & PATENTS

complete list: <https://scholar.google.com/citations?user=IDadFEkAAAAJ>

2022 Aug Characterisation of Procarbazine-induced Mutation Spectrum in the Bone Marrow of MutaMouse Males using Duplex Sequencing

Environmental & Molecular Mutagenesis conference

This poster characterizes genetic mutations in procarbazine-exposed mice using Duplex Sequencing as a potential replacement for the gold-standard Ames test. As the contract analyst to HealthCanada, I performed sequence alignment, variant calling and downstream analyses on the data. I also aided in the preparation of the poster.

Authors: Annette Dodge, Danielle LeBlanc, Andrew Williams, PHU T. VAN, *et al.*

2021 Jun Monocyte metabolic transcriptional programs associate with resistance to tuberculin skin test/interferon- $\gamma$  release assay conversion

Journal of Clinical Investigations

This manuscript reports a potential link between oleic metabolism and *Tuberculosis* resistance in humans. As the primary analyst on the project, I aligned the raw transcriptomic data to the genome, quantified gene expression, created data visualizations and made recommendations on downstream statistical/machine learning methods. I also wrote the computational parts of the manuscript.

Authors: Jason Simmons, PHU T. VAN, *et al.*

2019 Jul US10362237: Structured illumination system for increased dynamic range in quantitative imaging

United States Patent

"The systems disclosed herein employ an iterative image collection strategy that utilizes structured illumination to achieve greater than 1,000,000-fold dynamic range measurements, representing a dramatic improvement over the prior art."

Inventors: Jonathan Minden, Frederick Lanni, PHU T. VAN

2018 Nov ggCyto: next generation open-source visualization software for cytometry

Bioinformatics

This R package enables plotting of high-dimensional flow cytometry and mass cytometry data in the grammar-of-graphics style. I contributed to the R codebase, performed testing and co-wrote the manuscript.

Authors: PHU T. VAN\*, Wenxing Jiang\*, Raphael Gottardo, Greg Finak (\*co-first authors)
