# Phu T. Van, PhD

Machine Learning Specialist

pvan@alumni.cmu.edu , https://ptvan.github.io

#### **EDUCATION**

# Carnegie Mellon University

2014

Ph.D., Biological Sciences

# University of Washington

2007

B.S., Biology (Physiology specialization), B.S., Wildlife Sciences

#### **OBJECTIVE**

Seeking a scientific or technical position on collaborative teams working to solve data-intensive problems. I'm particularly interested in projects that utilize statistical modeling, simultation or machine learning.

#### **EXPERIENCE**

FredHutch October 2015 - Present

Bioinformatics Analyst, Analyst Group Leader

Seattle, WA

- · Performed differential gene expression and geneset enrichment analysis on transcriptomic datasets.
- · Performed variable selection and sensitivity analyses on flow cytometry datasets.
- · Led the lab's 3 PhD-level analysts in twice-monthly collaboration meeting and journal club.
- · Coordinated analyses on data integration project with South African Tuberculosis Vaccine Institute.
- · Authored Statistical Analysis Plans and peer-reviewed manuscripts.
- · Created bioinformatic analysis pipelines and interactive data visualizations.
- · Mentored PhD students and bench scientists on statistics, advised hiring and performed reviews of junior analysts code.

FredHutch

October 2014 - October 2015

Postdoctoral Fellow

Seattle, WA

- · Developed R code to normalize mass cytometry experiments using multi-mixture models.
- · Developed R code for writing XML files to enable data sharing of flow cytometry experiments.
- · Worked with engineers from FlowJo Inc. (Ashland, OR) to enable XML parsing in FlowJo v10.
- · Identified correlates of disease in early-stage vaccine candidates in mass cytometry data.

#### Carnegie Mellon University

August 2009 - May 2014

PhD Student

Pittsburgh, PA

- · Designed and built a patented high-dynamic-range protein gel imager with integrated gel cutting robot for identifying and capturing rare proteins.
- · Developed processes that improved reduction and alkylation of complex protein samples in preparation for mass spectrometric sequencing.
- $\cdot$  Developed automated bash and C/C++ workflows to quantify protein abundances and detection biases in 2DE gel images.

## Institute for Systems Biology

May 2006 - August 2009

 $Research\ Associate$ 

Seattle, WA

· Identified factors that affect peptide detectability in mass spectrometry experiments using R.

- · Constructed a SQLServer database with web frontend for exploring mass spectrometry data and planning proteomic experiments.
- · Developed a regression algorithm in R to model regulators of stress response in microarray data.

## TECHNICAL STRENGTHS

**Programming** R, Python, Matlab, C/C++, Perl

Data Analysis dimension reduction, clustering, regression/classification
Statistics linear models, variable selection, hypothesis testing

User Interfaces Shiny, PHP, JavaScript

Databases MySQL/MariaDB, PostgreSQL, SQLServer

Workflows Nextflow, Slurm, Docker, GitHub

Markup LaTeX, Markdown, HTML

Bioinformatics STAR, RSEM, BLAST, DEG, GSEA, KEGG, STRING
